

Arnson Environmental & Safety

Arnson Environmental & Safety (AE&S) provides services for Environmental, Health & Safety (EH&S) compliance. Leslie Arnson has specialized in EH&S compliance since 1989 and has worked in law firms, engineering firms, and EPA's Office of General Counsel. Prior to establishing AE&S, Leslie was the Environmental & Safety Manager for a hazardous waste treatment/waste oil recycling facility and Compliance Officer for an emergency spill reponse/hazardous waste transportation company.

Leslie F. Arnson

“ Leslie has provided OSHA, DOT and DEP/ EPA training to our employees for several years (e.g., hazmat, hazardous waste, security training, etc.). Her presentation of the technical standards, operating procedures, and all of the regulatory requirements that our personnel must meet is effective and has led to continuous improvement in our employees’ performance.”

Oscar Wilkins
Vice President
Ameritech Environmental Services, Inc.

“ Ms. Arson has also gone beyond certain duties by working with the local DEP and EPA to get straight answers when we had regulatory questions arise. She was able to obtain favorable rulings from the DEP regarding certain operating procedures. It is a wonderful feeling knowing you’re in compliance with these state and federal agencies, and that all work performed was of the highest standards.”

George W. Borden
Safety & Environmental Affairs Manager
American Pride Seafoods, LLC

“ Ms. Arson follows up after the agencies leave to ensure that compliance is maintained. It is a comforting feeling to know that you and your employees are in compliance. This could not have been accomplished without her skills.”

Kieran Chapman
Manager
North East ReFrigerated Terminals, N.A. Inc.
